

TEK-MESH™

IS THE MOST ADVANCED GUTTER PROTECTOR ON THE MARKET.

12 REASONS WHY TEK-MESH ADDS VALUE TO YOUR HOME

1. Eliminate gutter cleaning for life! **GAURANTEED!** Therefore, peace of mind.
2. **NO MORE MAINTENACE!** (The wind and rain will wash or blow off all debris.)
3. **NEVER** need to climb a ladder and risk injury.
4. **NO MORE UNWANTED NESTS** (Birds, wasps and/or bees), balls, or other toys in the gutter that cause gutter blockage.
5. **NO MORE STAGNENT WATER** therefore **NO MORE UNWANTED MOSQUITOS!**
6. Water will always flow cleanly, and so this water can be recycled for washing of cars and used in the garden...without debris!
7. Due to the product's **UNIQUE** design, leaves and debris cannot lay flat but will fall over the edge. During winter, snow and ice will not accumulate in the gutter but will slide over the edge thereby reduce the risk of ice-damming.
8. **TEK-MESH** assures that water entering the gutter will flow freely and travel to the downspouts, without restriction, thus eliminating water infiltration damage generally caused by water entering the home through its walls, windows, or roof.
9. By installing Tek-Mesh under the existing shingles or onto the fascia, all debris will fall over the edge and not accumulate as they would on conventional flat screens.
10. **TEK-MESH** is available in various colors - **NATURALLY BLENDING IN WITH THE COLORS OF YOUR ROOF OR GUTTERS, FOR ADDED BEAUTY.**
11. **GREAT SAVINGS!** Tek-Mesh can be installed by a handy home owner.
12. The product's warranty is transferrable to the next property owner.

FEATURES

- Robust, high tech aluminum micro-screen gutter protection.
- Protects gutters from leaves, birds and wasps – just to name a few.
- Handles any volume of water supported by the gutter.
- Strategically designed vents guide water flow **DIRECTLY INTO THE GUTTER.**
NO OVERFLOW.
- Rounded edge design enables debris to fall right-over the gutter, onto the ground, all year round –
NO MORE BLOCKAGE.
- Protector may be clipped and/or screwed down to the lip of the gutter providing solidity and reinforcing the gutter to the roof making it ***IDEAL FOR METAL CORRUGATED ROOFS.***
- Protector may be screwed onto the fascia in cases where homes have no shingles, gravel or metal roof.
- Designed for the do-it-yourself homeowner or general contractor providing the **VERY BEST** in gutter protection with the **EASE** in installation.
- Selection of colors (matching gutter or roof).
- **TEK-MESH** is **NOT** painted but **ANODIZED** to give richness and make the colors permanent.
- Available in 5-foot lengths.
- Does ***NOT RUST.***

Specifications:

- *Aluminum 12-gauge thickness*
- *5-foot lengths*
- *6 inches wide*
- *1 inch high*

Frequently Asked Questions

1) Why is **TEK-MESH** considered maintenance free?

Because it is positioned 1 inch higher than the gutter and flush with its edge. Debris has no place to go but off the gutter and onto the ground.

2) Where does the water go?

The water flows through the miniscule 2mm holes strategically placed in the micromesh. The water vents are angled carefully to collect heavy downpours.

3) Can the **TEK-MESH** rust?

No, **TEK-MESH** is made of aluminum.

4) Can I install **TEK-MESH** myself, or must I have a certified installer install it for me?

TEK-MESH is very easy to install, and is designed for a do-it-yourself installation, but nevertheless you do need a few basic tools.

5) Will **TEK-MESH** fit different models of gutters?

Yes, **TEK-MESH** has been designed to fit all models of gutters, whether they are G style or K style, or even the rounded edge style.

6) If I do not have a shingle roof, but have a tar and gravel roof, can I still have **TEK-MESH** installed?

Yes, you can have **TEK-MESH** installed, but you would need a bender to bend the back portion of the **TEK-MESH** upward and then screw that back portion into your fascia.

7) If I have a metal roof, can I have **TEK-MESH** installed?

Yes, you can have **TEK-MESH** installed, by unscrewing your corrugated metal roof and sliding the **TEK-MESH** underneath, and then re-screwing your metal roof back down. The front edge is clipped onto the lip of the gutter.

8) Can the wind blow the **TEK-MESH** off my gutter after I install it?

No it will not. **TEK-MESH** is made to be screwed down if needed. Otherwise the design of the **TEK-MESH** is made with a wide flap to grip below the edge of the gutter, and the other side under the shingle.

9) Can **TEK-MESH** prevent icicles from forming?

TEK-MESH is designed to keep your gutters clean and free from blockage. It is also designed so that you do not have to clean it either. **TEK-MESH** is made of aluminum hence releasing ice and snow onto the ground, not allowing the gutter to be filled. Since every home is different and ventilation and insulation vary, it's hard to guarantee that there will never be icicles.

10) What is the product warranty?

TEK-MESH gutter protection system warrants to protect gutters from blocking by almost all debris, including leaves, branches, tiny berries, maple seeds, birds, rodents, as well as wasps and bees. It is not guaranteed against blockage with pine needles, or other similar needles. It is also not guaranteed against blockage caused by sap dripping, such as from spruce trees.

The lifetime warranty is transferable between homeowners for the lifetime of the house.

Exclusions:

Damages due to acts of God, natural disasters, such as falling branches and trees.

Damages caused by roof maintenance, such as damages caused by ladders.

** Painting the specially anodized aluminum will also void the warranty. **

11) Can I return my TEK-MESH?

Yes. Any unused, full 5-foot sheet of Tek-Mesh may be returned for refund. **Must be in its' original condition.**

12) If I have questions or am not sure how to install it, do you have a toll-free number to call?

Yes certainly, you can call either our toll-free number at:

Canada: 1-866-923-4812

USA: 1-855-468-0088

or e-mail us at info@kemf.ca
